

## Dr. Amy T. Bandy

Cosmetic Plastic Surgeon, Board-Certified Plastic and Reconstructive Surgeon

If you have considered improving your appearance, or simply want to restore your appearance to a more youthful state, Dr. Amy T. Bandy can help you attain the look you want with the least amount of down time for recovery. She offers techniques in minimally invasive surgery to minimize scarring, as well as a complete array of dermal fillers and Botox to provide you with the most natural look without the telltale signs of surgery.

One thing that sets Dr. Bandy apart in the field of plastic and reconstructive surgery is her ability to make patients feel at ease. In fact, many former patients comment on the warm, caring staff at her office, and the thoroughness of their consultation. Dr. Bandy spends time with each person to fully understand what they are looking to achieve.

Dr. Bandy offers prospective patients a full library of before and after pictures to browse through before they make a decision. The office also offers video imaging to help people see what they might look like following a procedure. Each person is individually evaluated to determine which procedure will optimize their results.

Dr. Bandy says the most common surgical requests she receives are for liposuction and breast enhancement. "I think the reason I do so many of these procedures is that a lot of women feel more comfortable coming to a woman about these issues. They feel I can relate to their concerns," says Dr. Bandy, whose patients range in age from young children to people in their 70s and 80s.

Dr. Bandy finds that many patients seek her out for corrective breast surgery. After having had a previous surgery that may not have been as successful as anticipated, patients will seek the

expertise of Dr. Bandy's artistry to regain their youthful breasts. After corrective surgery with Dr. Bandy, many women find that they have been able to attain results they never imagined possible. In addition to breast surgery, all aspects of body contouring are offered by Dr. Bandy, including tumescent and ultrasonic body sculpting, mini and full tummy tucks, and the full array of facial cosmetic surgery and non-surgical rejuvenation techniques, such as peels and laser, Botox, injectables, fillers and skin-care regimens.

"I've had women in the 60s and 70s who wanted to make some improvements their whole lives and finally decided it was time. It's very rewarding to see that happen—it's never too late to make a change for the better."

Dr. Bandy is board certified by the American Board of Plastic Surgery. She is a member of the American Society of Plastic Surgeons and the California Plastic Surgery Society, and is a fellow of the American College of Surgeons. When she is not busy with her cosmetic practice, she offers her time and talents by providing pro bono work throughout the world to indigent children and young adults with cleft palates.

Dr. Bandy performed her general surgery training at Harbor UCLA Medical Center in Torrance. After that training, she moved to Michigan, where she completed her plastic and reconstructive surgery residency at Wayne State University. Additionally, she trained at Manhattan Eye, Ear, Nose and Throat Hospital in New York City, where she performed all aspects of facial cosmetic surgery, including layered face lifts, endoscopic face and brow lifts, eyelid surgery and nasal beautification surgery.

Dr. Bandy practices all aspects of plastic surgery from her two Southern California offices in the South Bay and Newport Beach.
